
HELP - live flight tracking

Posted by heli7 - 2009/02/12 18:30

hi to all - hope someone can help me - i came across a site last week that gave me LIVE FLIGHT TRACKING (no audio) just visual - of the SE QLD BRISBANE / GOLD COAST area - and dammed if i can find it again. The page looks like a VTC but with "crosshairs" updating/vectoring every few seconds!!i thought i saved the link / or remembered the site name - but no - even tried different searches no go. Does anyone know of this site/link, or one which does the same. Probabaly is a nationwide site but i just watched traffic around YBBN, cheers heli7B)

I see you found the link (Airservices Australia has a link to it from their Aircraft Noise section ounder Aviation & Environment)

You do realsie it's not live, but delayed by around 30 minutes.
